Exercise 2: Python: Loops, Functions & DRY

In this exercise you will practice a writing some functions in Python. For this exercise divide yourself in groups of 2-3 students.

1. Use your favourite editor to complete the exercises in hw2.py
2. Complete the exercises 1-3 in one python file called 'hw2_first_questions.py'.
3. Complete the exercises 4-6 in one python file called 'hw2_second_questions.py'.
4. Complete the exercises 7-9 in one python file called 'hw2_third_questions.py'.
5. Complete the exercises 10 in one python file called 'hw2_fourth_questions.py'.
6. Create a Github account individually.
7. Create a repository in the account of one of the components of the group.
8. Clone the repository locally each of the components of the group.
9. Commit each of the exercises in the repository. (Each component of the group has to do at least one commit).
10. Share the link to the repository through Classroom by delivering the assignment and let my user (Icedgarr) have access to it. (If you created a public repository you won't need to do anything to grant me access, if you created a private repository you should invite my user)
